

Level 3 Refrigerant Handling Course – 1 Day

This training course has been developed for individuals working on Mobile Air Conditioning systems. In line with current legal requirements, Technicians working on air con systems must achieve a refrigerant handling qualification that meets the EC 824/2006 regulation. We offer the City & Guilds 7543-01 Level 3 Award in Basic Mobile Air Conditioning which meets this requirement.

The course covers F-Gas regulations, health & safety, refrigerants, air conditioning principles, component identification and system operation. This course delivers both theory and practical elements. 2 units, handle refrigerants and basic mobile air conditioning principles.

F-Gas Regulations.

It is against the law to work with F Gas if you do not have the correct qualifications. You could receive a fine.

“You must have your own qualifications to work on equipment containing F Gas, even if you work for someone else.”

You must have a Level 3 qualification to recover refrigerant from mobile air conditioning systems in:

- Goods vehicles weighing less than 3,500kg
- Passenger vehicles with 8 seats or fewer
